The Heart of Texas (HOT) Workforce Board, through the administration of the workforce development and work support programs, aims to provide quality workforce services, resources, and skill training for industries, businesses, and job seekers to contribute to the economic strength and growth of the Heart of Texas area.

This public transportation project will provide access for employment, skills training, recreation, or other services for Falls County and rural McLennan County residents. This project, now branded as 6 To Success, will be the first fixed route service of its kind in the region.

The main benefit of this route is its connection to the urban Waco Transit system. This transfer station provides access to all of the transfer buses running on the Waco Transit System as well as the Greyhound Station for more extended riding. Through transfer points, riders can access employment or education destinations, the Heart of Texas Full Service Workforce Center, or other service or goods needs in Waco.

Ultimately, this additional bus route will connect Falls County and rural McLennan County residents to destinations that they previously had no or little access to. Not only is this access now being provided, it is being provided at low costs and in an effort to connect riders to education, employment and recreation.

The 6 To Success bus route is to be unveiled November 12, 2007. The route running along State Highway 6 from Marlin to Waco will be made available to the public for their transportation needs. The 6 To Success service offers 6 trips a day, 6 days a week, Monday through Saturday. For more information regarding 6 To Success, please visit [www.6ToSuccess.com](http://www.6ToSuccess.com).
